Preface

Welcome to the syllabus for the Major in Physical Education and Minor in Fitness Management. This comprehensive program is designed to provide students with a deep understanding of the principles, theories, and practices necessary to excel in the fields of physical education and fitness management.

Physical Education, as a major, encompasses a wide array of subjects aimed at promoting physical activity, health, and overall well-being. Through a combination of theoretical knowledge and practical application, students will explore topics such as anatomy, exercise physiology, motor learning and development, sports psychology, and teaching methodologies. This major prepares individuals for careers in teaching, coaching, sports administration, and fitness instruction.

Complementing the Major in Physical Education, the Minor in Fitness Management offers students the opportunity to delve into the strategic aspects of fitness program development, implementation, and evaluation. With a focus on exercise prescription, nutrition, injury prevention, and business management, students will acquire the skills necessary to design and manage fitness programs tailored to diverse populations and settings.

Throughout this syllabus, students will find a balance of academic rigor and hands-on experiences, ensuring that they are equipped with both the knowledge and practical skills needed to succeed in the dynamic fields of physical education and fitness management.

We encourage students to approach their studies with curiosity, dedication, and a commitment to lifelong learning. By actively engaging with the material presented in this syllabus and seeking opportunities for experiential learning, students will be well-prepared to make meaningful contributions to the promotion of health and fitness in their communities and beyond.

We wish you all the best on your academic journey and look forward to seeing the incredible impact you will make as future leaders in the fields of physical education and fitness management.

Board of Studies & External Experts

NAME	DESIGNATION
ASHISH JOSEPH, Assistant Professor & Head, Department of Physical Education, St Thomas College Palai	Chairperson
Prof (Dr). SINDHU RS. Professor & Head, Department of Physical Education, St Thomas College Kozhencherry	Chairperson (Ex officio) PG BOS
DR. VINEEDKUMAR K. Assistant Professor & Head, Department of Physical Education, Mar Thoma College Perumbavoor	Member
DR. SONI JOHN T, Associate Professor & Head, Department of Physical Education, Christ College Irinjalakuda	External Member
DR. SAJEEV JOS Assistant Professor & Head, Department of Physical Education, St Alberts College Ernakulam	Member
ANUP JAIN M J Assistant Professor & Head, Department of Physical Education, SSV College Perumbavoor	Member
ANOOP NAZEER Assistant Professor & Head, Department of Physical Education, MES College Nedukandam	Member
PRAVEEN THARIYAN Associate Professor & Head, Department of Physical Education, S D College Kanjirapally	Member
DR. BINDU. M Associate Professor & Head, Department of Physical Education, U C College Aluva	Member
DR. XAVIOUR G Associate Professor & Head, Department of Physical Education, Government College Nattokam	Member
AKHIL J Assistant Professor & Head, Department of Physical Education, SNM College Maliankara	Member

DR SANTOSH J(Rtd) Associate Professor & Head, Department of Physical Education, Nirmala College Muvattupuzha	Member
Prof (Dr) ANIL RAMACHANDRAN Professor & Head, Department of Physical Education, Kannur University, Kannur	External Expert

Syllabus Index

Name of the Major: **Physical Education and Sports**

Semester: 1

Course Code	Title of the Course	Type of the Course DSC, MDC, SEC etc.	Credit	Hours/ week	Hour Distribution /week			
					L	T	P	O

MG8DCEPES400	Sports Content Creation and presentation	DCE	4	5	3		2	
MG8DCEPES401	Technology & E Sports		4	5	3		2	
MG8DCEPES402	Sports Sociology		4	5	3		2	
MG8PRJPES400	Project/Internship	PRJ	12					

SEMESTER 1

MGU-UGP (HONOURS)

Syllabus

Mahatma Gandhi University Kottayam

Programme	**BPES (Honours)**					
Course Name	**Foundation of Physical Education and Recreation**					
Type of Course	DSC A					
Course Code	MG1DSCPES100					
Course Level	**100**					
Course Summary	This course provides a comprehensive introduction to the foundational principles, historical development, and contemporary issues in physical education and recreation. Students will explore the philosophical, psychological, and sociological aspects of physical education and recreation, gaining a solid foundation for further studies in the field.					
Semester	1	Credits			4	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		3		1		75
Prerequisites, if any						

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	To understand the foundations of physical education and recreation	K, U	1
2	An overview of evolution of physical education and recreation	U	1
3	Analyse the Philosophical Foundations of physical education	A, U	2
4	An overview of misconception in physical education	U	2
5	analyse the importance of physical education in present era	K, U	3
6	To understand and analyse the importance of recreation in socio cultural dimension in physical education	A, K	6
7	To planning and organise the outdoor adventure activities	C, E, A	5

Programme	**BPES (Honours)**					
Course Name	**Basic First Aid and CPR**					
Type of Course	MDC					
Course Code	MG1MDCPES100					
Course Level	**100**					
Course Summary	This certificate course provides students with the fundamental knowledge and skills required to respond effectively to medical emergencies and provide basic first aid and cardiopulmonary resuscitation (CPR) interventions. Through theoretical instruction, practical demonstrations, and hands-on practice, students will learn to assess, prioritize, and administer appropriate care in emergency situations.					
Semester	1	Credits			3	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		2		1		60
Prerequisites, if any						

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	To understanding of fundamental first aid principles, including scene safety, patient assessment, and the appropriate steps to take in various medical emergencies.	K, U	
2	able to perform cardiopulmonary resuscitation (CPR) on adults, children, and infants according to established guidelines, including chest compressions, rescue breaths, and the use of automated external defibrillators (AEDs).	U	
3	acquire the skills to provide basic first aid interventions for common medical emergencies such as bleeding control, wound care, musculoskeletal injuries, burns, and allergic reactions.	A, U	
4	An overview of misconception in physical education	U	
5	Students will engage in self-reflection to identify areas for improvement and further skill development in providing first aid and CPR interventions, fostering a commitment to lifelong learning and professional growth.	K, U	

6	Students will learn to prioritize care based on the severity of injuries or illnesses, effectively triaging patients and providing appropriate treatment while awaiting professional medical assistance	A, K	
7	Students will understand and adhere to ethical and legal standards in providing first aid and CPR interventions, including obtaining consent, maintaining patient confidentiality, and protecting the rights of individuals.	C, E, A	
8	Students will demonstrate proficiency in performing CPR, using AEDs, applying first aid techniques, and managing medical emergencies through hands-on practice sessions and simulated scenarios	U,E,S	
Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)

Programme	**BPES (Honours)**					
Course Name	Introduction to Yoga					
Type of Course	MDC					
Course Code	MG2MDCPES101					
Course Level	100					
Course Summary	The program covers a range of topics related to yoga philosophy, teaching methodology and practical instruction.					
Semester	2	Credits			3	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		2		1		60
Pre-requisites, if any						

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	Understanding of yoga philosophy, anatomy, and related subjects	U	1
2	To develop knowledge and performance of yoga asanas ,surya namaskar and kriyas	S	3,4
3	To learn about yoga and its benefits in daily life	U &An	6,1
4	Understanding of Yogic Lifestyle which may include ethical considerations, mindfulness practices, and a holistic approach to well-being.	A, An & C	1,6,7
5	To develop effective teaching skills and learn how to create well-structured and engaging yoga classes	C , I & S	2,3,9
**Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)*			

COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course description	Hrs	CO No.
1-Yoga Philosophy and History	1	Introduction to the origins and history of yoga.	2	1
	2	Exploration of yogic science and its application in modern life	4	2,3
	3	Different concepts and pathways of Yoga	3	4
	4	Physical, Physiological and psychological benefits of yoga and the impact of asanas (poses) on the body .	3	3
	5	Basic anatomy of the human body , human Posture , postural deformities.	3	1
Yogic concepts	1	Detailed study and practice of yoga asanas, including proper meaning , alignment, adjustments, and modifications.	3	2
	2	Yoga - opening and closing prayer ,Techniques for breath control and awareness.	3	2
	3	Understanding the relationship between breath and movement. Incorporating pranayama into yoga classes	3	2
	4	Introduction to meditation techniques. Incorporating mindfulness practices into yoga classes.	3	3
	5	Exploring the mental and emotional aspects of yoga.	3	4
3. Asana (Yoga Poses), Pranayama	1	Surya namaskar - (12 pose) , meaning , importance and benefits .	6	4

(Breath Control) & Meditation, kriyas and Mindfulness		Standing Asana – Ardhakatichakrasana, Trikonasana, ParivrttaTrikonasana, Parsvakonasana, Ardhacakrasana, Padahastasana		
	2	Sitting Asana meaning , importance and benefits - Vajrasana, Sasankasana, Supta Vajrasana, Pascimatanasana, Ustrasana, Padmasana, Vakrasana, Ardha matsyendrasana	6	4
	3.	Lying Asana(meaning , importance and benefits) – Prone Postures and supine postures Bhujangasana, Salabhasana, Dhanurasana, Sarvangasana, Matsyasana, Halasana, Chakrasana, Viparitakarani	6	4 2
	4	Pranayama's	6	2
	5	Yoga kriyas - cleansing practices Trataka ,jala neti (using water) and sutra neti (using a thread or catheter)	6	5
4 – Teacher Specific Component				

Teaching and Learning Approach	**Classroom Procedure (Mode of transaction)** • Lecture (Chalk & Board, Power Point presentation) • Group discussion • Peer teaching • Demonstration • Hands on training
Assessment Types	**MODE OF ASSESSMENT** **Continues Comprehensive Assessment (CCA) Total Mark - 30** Practical CCA-15 mark, (Presentation, individual involvement) Theory CCA -15 marks (Written exam- short answer -10x1, viva)
	End Semester Examination (ESE)Total Marks-70 ESE Practical -35 marks (Viva, presentation, assignment, quiz) ESE Theory –35 marks (Written examination theory – MCQ 10x1, Short Answer – 5x2, Short Essay - 3x5).

SEMESTER 3

Mahatma Gandhi University
Kottayam

Programme	**BPES(Honours)**					
Course Name	**Introduction to Sports Psychology**					
Type of Course	DSC A					
Course Code	MG3DSCPES200					
Course Level	**200**					
Course Summary	Provides an understanding of the science and practice of sport psychology from both a theoretical and applied perspective. The primary emphasis is on the educational and performance enhancement roles of the field. Develop a strong foundation for further professional development and specialization in the field of sports psychology.					
Semester	**3**	Credits			**4**	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		4				**60**
Pre-requisites, if any						

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	Gain a solid understanding of fundamental psychological principles and concepts.	U	3
2	Application of various psychological techniques and interventions to enhance athletic performance	A	1,10
3	Acquire skills and knowledge about sport and exercise psychology that can be applied as a coach, teacher, athletic trainer and an athlete	S	4,5,9,10
4	Analyze the relationship between psychological factors and performance.	An	1,2
5	Evaluation of psychological mechanisms of human behavior in sports.	E	6,7,8
6	Design innovative sports psychology interventions to address emerging challenges in the field	C	5,9
7	Involvement in identifying, analyzing and resolving the root causes of mental performance problems	I	6
8			
Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)

Programme	BPES (Honours)					
Course Name	**Safe Training in Sports**					
Type of Course	VAC					
Course Code	MG3VACPES200					
Course Level	**200-299**					
Course Summary	The Safe Training course provides a comprehensive understanding of creating and maintaining secure environments in strength and conditioning. Emphasizing informed consent, participants learn to implement robust procedures, ensuring participants are fully aware of potential risks. The course covers the importance of clear warnings and effective supervision techniques to minimize hazards during training. Facility evaluation is explored to establish safe training spaces, and collaboration with a performance safety team is emphasized to address and mitigate risks. Graduates will be proficient in fostering safety through informed decision-making, proactive supervision, facility optimization, and teamwork in strength and conditioning settings.

Programme	BPES (Honours)					
Course Name	**EXERCISE AND WEIGHT MANAGEMENT**					
Type of Course	SEC					
Course Code	MG4SECPES201					
Course Level	**200-299**					
Course Summary	Essential for the understanding of weight management and it provide the learner to manage and monitor various type of exercises and its impact on human body					
Semester	4	Credits			3	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		3				45
Prerequisites, if any	Basic awareness about physical fitness and physical activities					

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	To explore the science of body composition, including the various components of the human body, methods for assessment, and strategies for managing body composition for health and maintenance of ideal bodyweight.	U	1,3
2	To understand the relationship between exercise and weight management, emphasizing the physiological and behavioural aspects of achieving and maintaining a healthy weight through physical activity.	U	1,3,6
3	To inculcate knowledge on principles of nutrition and their application to weight management, the impact of dietary choices on body weight, metabolism, and overall health,	AP	10,1

	with a focus on evidence-based strategies for weight loss and maintenance.		
4	To explore the relationship between exercise and weight management, emphasizing the physiological and behavioural aspects of achieving and maintaining a healthy weight through physical activity. To learn about different exercise modalities and behaviour change strategies to promote effective weight management.	AP	10
5	Formulation of specific programmes for weight management. Hands on training on organizing training programmes for weight management.	U	9,3
Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)			

6. COURSE CONTENT CONTENT FOR CLASSROOM TRANSACTION (UNITS)

Module	Units	Course description	Hrs	CO No.
Body composition and body weight	1	Concept of body weight and importance of ideal body weight	1	1
	2	Meaning , Components and factors effecting body composition	2	1,2
	3	Body Types and its characteristics (Pyknic, Athletic and Aesthetic)	3	1,2
	4	Methods for assessing body composition	3	3
	5	Understanding fat lose and weight lose	1	2
Basic concepts of weight management	1	Obesity-Causes-risk factors	1	2
	2	Under Weight –Causes and Risk Factors	2	3
	3	Myths & Misconception of weight management- Influence of mobile applications–influence of social media. Fake Institutions and trainers	2	3

	4	Guidelines to lose weight and weight gain- Strategies for weight maintenance- Building a personal action plan for long-term success- - Goal setting and motivation strategies	1	3
	5	**Behavioural Aspects of Weight Management-** Stress management and its impact on weight-**Lifestyle and Long-Term Success-** Sustainable lifestyle changes	1	4
Diet and Weight Management	1	Need and Importance of nutrition in weight management- Basics of energy balance and metabolism-Principles of healthy eating- Balanced diet	2	4,5
	2	Diet - Components of Diet- -micro nutrients and macro nutrients-Caloric intake and macronutrient distribution	2	4,5
	3	Basal Metabolic Rate- Daily energy requirements calorie intake and expenditure-	2	5
	4	Eating disorders-binge eating, aneroxia nervosa, bulimia.Junk Food -	2	5
	5	Food Supplements and weight management.	2	5
Exercise and Weight Management	1	Introduction to Physical activity- Definition, Aim and Objectives, of exercise - principles of exercise	6	6
	2	Types of exercise and Its benefits - Exercise and safe heart zone	6	6
	3	Importance of Cardio vascular and strength workouts in weight management -	6	6,7
	4	Yoga -its role in weight management	6	7

	5	High-intensity interval training (HIIT) its role in weight management	6	7
5 Teacher Specific Component				

Teaching and Learning Approach	**Classroom Procedure (Mode of transaction)** • Lecture (Chalk & Board, Power Point presentation) • Group discussion • Peer teaching • Demonstration Hands on training
Assessment Types	**MODE OF ASSESSMENT** **Continuous Comprehensive Assessment (CCA) 25** Theory CCA -15 marks -(Written exam- short answer -10x1, viva) CCA -10 mark, (Presentation, viva , individual involvement)
	End Semester Examination(ESE) 50 Marks ESE Theory –50 marks (Written examination theory – MCQ 5x1, Short Answer – 5x2, Short Essay - 4x5, Essay-1 x 15).

Programme	BPES (Honours)					
Course Name	**Child Protection Policies and Ethics**					
Type of Course	VAC					
Course Code	MG4VACPES200					
Course Level	**200-299**					
Course Summary	This course will provide an overview of the key concepts and issues in child protection and sports ethics. It will explore the legal and ethical frameworks that govern the involvement of children in sport, and will discuss a range of strategies for promoting positive and safe sporting experiences for all children.					
Semester	**4**	Credits			**3**	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		3				**45**
Pre-requisites, if any						

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	Understand the reporting procedures for child abuse	U	1,6
2	Students can to use their knowledge of child protection and sports to make ethical decisions in sports.	A	2,8
3	Identifying the root causes of ethical problems in sports	An	1,2
4	Attainment of skill to educate others about child protection and sports ethics	S	9,10
5	Students will be able to create and implement ethical solutions to sports related problems	C	6,8
6	Evaluating and applying ethical criteria to sports related decisions.	E	6,7
Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)			

COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course description	Hrs	CO No.
1 Introduction to child protection	1.1	Meaning and Definition	3	1
	1.2	Understanding the importance of child abuse.	4	1
	1.3	Role of adult in protecting children Child protection policies • Child rights • Juvenile justice • Prohibition of child marriage • Protection of children from sexual offences • Child labour	8	2,3
2 Child protection policies and procedures	2.1	Child protection procedures • National child protection policies • Ministry of women and child development guidelines • Implementing of child protection policies and procedures. • Child Protection Policies • Challenges of child protection	5	1,2,4
	2.2	• Implementing of child protection policies and procedures. • Child Protection Policies • Challenges of child protection.	5	2,3,5
	2.3	• Positive and safe sporting environment for children • Relation between Play and Childhood • Creating a child centred sporting environment Addressing bullying and discrimination	5	4,5,6
3 Identifying and responding to child abuse And Sports Ethics	3.1	Recognizing signs and symptoms of child abuse Types of child abuse • Physical • Sexual • Emotional • Neglect	2	6

	3.2	Reporting child abuse • Report to authorities • Seek professional help • Maintain confidentiality Responding to disclosures of child abuse • Listening to the victim • Re assure the child • Seek support for the child • Patient and understanding	3	2,5,6
	3.3	Introduction to sports ethics • Defining sports ethics • Importance of sports ethics • Role of ethics in sports	2	1,2
	3.4	Fair play and sportsmanship • Understanding the principles of fair play andsportsmanship • Promotion of fair play and sportsmanship • Addressing cheating and unfair play	2	3,4,5
	3.5	Role of ethics in sports organizations • Developing and implementing ethical codes of conduct • Promotion of ethical decision making • Creating a culture of integrity: Doping, match fixing, bribery, cheating, violence, sexual harassment, discrimination.	3	3,4,6

Teaching and Learning Approach	**Classroom Procedure (Mode of transaction)** • Lecture (Chalk & Board, Power Point presentation) • Group discussion • Peer teaching • Demonstration Hands on training
Assessment Types	**MODE OF ASSESSMENT** **Continuous Comprehensive Assessment (CCA) 25** Theory CCA -15 marks -(Written exam- short answer -10x1, viva) CCA -10 mark, (Presentation, viva , individual involvement)
	End Semester Examination(ESE) 50 Marks ESE Theory –50 marks (Written examination theory – MCQ 5x1, Short Answer – 5x2, Short Essay - 4x5, Essay-1 x 15).

SEMESTER 5

	Mahatma Gandhi University **Kottayam**

Programme	**BPES (Honours)**				
Course Name	**Physiology of Exercise**				
Type of Course	DSC A				
Course Code	MG5DSCPES300				
Course Level	**300-399**				
Course Summary	Exercise Physiology a field of study that explores how the body responds and adapts to physical activity and exercise. It involves examining the acute and chronic effects of various forms of exercise on the physiological systems of the body. Exercise physiologists seek to understand the mechanisms underlying these responses and use this knowledge to optimize performance, enhance fitness, and improve overall health.				
Semester	5	Credits		4	Total Hours
Course Details	Learning Approach	Lecture	Tutorial / Practical	Others	
		4			60
Pre-requisites, if any	Foundation course needed				

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	Understand the physiological responses of the human body to exercise	U	6
2	Analyze the various energy systems utilized during physical activity	A	1,2
3	Explain the cardiovascular and respiratory adaptations to exercise, Evaluate neuromuscular function and its adaptations to training. Interpret the endocrine responses and their role in exercise.	E	3
4	The impact of environmental factors on exercise performance	E, An, A	8,6
5	Nutritional strategies for enhancing exercise performance.	An, U	6
6.	Understanding the body components	U	6
7	Tailoring exercise program according to the needs special population and ensuring safety	A, E	5,4,2

Programme	**BPES (Honours)**					
Course Name	**BIOCHEMISTRY OF EXECISE**					
Type of Course	DSE					
Course Code	MG5DSEPES300					
Course Level	**300-399**					
Course Summary	This course will provide an in-depth overview of the biochemical processes that occur in the body during exercise. Students will gain a comprehensive understanding of energy systems, muscle contraction, muscle adaptation, and the metabolic effects of exercise. The course will also explore the role of biochemistry in exercise performance and exercise induced health benefits.					
Semester	5	Credits			4	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		4				60
Pre-requisites, if any						

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	Understand the biochemical processes involved in energy production during exercise,	U	6
2	Analyse the mechanism happening during muscle contraction.	An	2
3	Create awareness about the adaptations that occur in muscle tissue in response to exercise.	C	1,6
4	Evaluate the metabolic effects of exercise on various organs and tissues.	E	1
5	Discuss the role of biochemistry in exercise performance and exercise induced health benefits	E	4,7
6	Apply advanced knowledge of exercise biochemistry to prescribe personalized exercise programs considering individual differences, training status, and specific performance goals	A	7,4

7	Develop an interest in current research literature in exercise biochemistry, critically evaluating and discussing recent advancements and controversies	I	4,,6,7
8	Students will be able to design and propose comprehensive biochemical adaptations to exercise programs tailored for specific athletic goals	C	1,2,3
Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)			

COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course description	Hrs	CO No.
1 **Introduction to Exercise Biochemistry**	1.1	Overview of Exercise Biochemistry • Definition and scope of exercise biochemistry • Historical development and key milestones	3	1
	1.2	Energy Systems • Overview of ATP production during exercise • Anaerobic and aerobic pathways	4	2
	1.3	Cellular Adaptations to Exercise • Changes in gene expression • Signaling pathways involved in exercise adaptation	3	2
2. **Metabolism and Substrate Utilization and Oxygen Transport and Utilization**	2.1	Carbohydrate Metabolism during Exercise • Glycolysis and glycogenolysis • Gluconeogenesis and regulation	3	4
	2.2	Lipid Metabolism • Fatty acid oxidation and lipolysis • Regulation of lipid metabolism during exercise Protein Metabolism • Protein synthesis and breakdown • Amino acid metabolism during exercise	4	3

	2.3	Respiratory Physiology • Gas exchange in the lungs • Oxygen and carbon dioxide transport in the blood	3	3,4
	2.4	Oxygen Utilization by Muscle • Mitochondrial function and oxidative phosphorylation • Factors influencing oxygen consumption during exercise	5	3,2
3. **Nutritional Biochemistry for Exercise**	3.1	Macronutrients and Micronutrients: • Role of carbohydrates, proteins, and fats in exercise • Impact of vitamins and minerals on performance	5	3
	3.2	Nutritional Strategies for Endurance and Strength Training • Pre-, during-, and post-exercise nutrition • Supplements and their effects on exercise biochemistry	5	5,6
4 **Environmental, Genetic Factors**	4.1	• Impact of temperature, altitude, and humidity on exercise biochemistry • Acclimatization and adaptation. Genetic Variability in Exercise Response • Individual differences in biochemical responses to exercise • Geneticfactors influencing athletic performance •	5	7

	4.2	Aging and Exercise • Biochemical changes with aging Role of exercise in mitigating age-related change	5	8
	4.3	Immune System and Exercise • Impact of exercise on immune function • Relationship between exercise intensity and immune response	5	5,6
5. Teacher Specific Component

Programme	**BPES (Honours)**					
Course Name	**Recovery and Wellness**					
Type of Course	DSE					
Course Code	MG5DSEPES304					
Course Level	300-399					
Course Summary	This course offers a holistic exploration of wellness, emphasizing its diverse dimensions. Participants will delve into various wellness strategies, gaining practical experience in recovery techniques, with a specific focus on sports massage and its associated benefits. The curriculum covers the classical strokes of massage, understanding the advantages of using a foam roller, and introduces technology-assisted approaches for recovery. Emphasis is placed on the crucial role of massage in recovery and injury prevention. By the end of the course, participants will have a well-rounded understanding of wellness practices and the application of massage in promoting physical well-being.					
Semester	5	Credits			4	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		4				60
Pre-requisites, if any	Basic knowledge about Anatomy and Physiology, basics of sports training

Programme	**BPES (Honours)**					
Course Name	**SPORTS EVENT MANAGEMENT**					
Type of Course	DSE					
Course Code	MG6DSEPES300					
Course Level	**300-399**					
Course Summary	This course provides a comprehensive overview of event management in the field of sports, focusing on key elements crucial for successful execution. Participants will gain insights into the coordination functions of venue management teams, understanding logistics, safety, and security dynamics. The curriculum covers the entire event lifecycle, from bidding and designing to planning and operation, establishing a framework for efficiency and success. Additionally, participants will learn to mitigate risks and enhance revenue in ticketing and hospitality through innovative pricing strategies. Participants will also grasp the significance of knowledge management for organizational sustainability and continual improvement in event quality. By the end of the course, students will be equipped to apply foundational event management principles to the dynamic landscape of sports events.

Module	Units	Course description	Hrs	CO No.
1 Basics of doping and Ergogenic Aids	1.1	Definition of Doping and Ergogenic Aids History of Doping in sports	3	1
	1.2	Basic principles and categories of Ergogenic. Different types of doping and masking	3	1
	1.3	Anti-doping agencies and their functions – WADA & NADA	3	5
	1.4	Permissible supplements, Nutritional strategies and training methods	3	4
	1.5	Anabolic steroids, stimulants, blood doping and masking agents.	3	2,3
2 Permissible and prohibited substances and method of doping, Legal and ethical implementations	2.1	Ergogenic aids and its types Procedure for blood doping	4	3,4
	2.2	Current regulations and control of doping in sports	3	3
	2.3	Code of ethics Consequences of doping	4	1,2
	2.4	Prohibited substances and methods Testing and detection methods	4	4
3 Athlete responsibility and rehabilitation	3.1	Accountability and education Rehabilitation protocols	5	4
	3.2	Acceptance of responsibility Continuous monitoring and support	5	4,5
	3.3	Ethical re orientation and community engagements	5	5
Teacher Specific Components				

Teaching and Learning Approach	**Classroom Procedure (Mode of transaction)** • Lecture (Chalk & Board, Power Point presentation) • Group discussion. • Peer teaching • Demonstration Hands on training
Assessment Types	**MODE OF ASSESSMENT** **Continuous Comprehensive Assessment (CCA) 25** Theory CCA -15 marks -(Written exam- short answer -10x1, viva) CCA -10 mark, (Presentation, viva , individual involvement)
	End Semester Examination(ESE) 50 Marks ESE Theory –50 marks (Written examination theory – MCQ 5x1, Short Answer – 5x2, Short Essay - 4x5, Essay-1 x 15).

SUGGESTED READINGS

1."Doping in Elite Sport: The Politics of Drugs in the Olympic Movement" by Ivan Waddington and Andy Smith - Explores the history, culture, and politics surrounding doping in elite sports, offering insights into the complex issues surrounding drug use.

2."Doping in Sport and the Law" by Ulrich Haas and Deborah Healey - Examines the legal aspects and challenges related to doping in sports, including international regulations and the role of law in addressing doping issues.

3,"Performance-Enhancing Technologies in Sports: Ethical, Conceptual, and Scientific Issues" edited by Thomas H. Murray - Covers various ethical, scientific, and conceptual dimensions of performance-enhancing technologies, including doping.

4."Drugs in Sport" by David R. Mottram - Provides a comprehensive overview of drug use in sports, including the history, pharmacology, and detection of performance-enhancing substances.

SEMESTER 7

Mahatma Gandhi University
Kottayam

Programme	**BPES (Honours)**					
Course Name	Understanding Energy Expenditure and Fatigue					
Type of Course	DCC					
Course Code	MG7DCCPES400					
Course Level	**400-499**					
Course Summary	To understand the science of human metabolism during exercise and the physiological causes behind fatigue.					
Semester	7	Credits			4	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		4				60
Pre-requisites, if any						

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	To understand energy sources	U	1
2	To understand the energy system during exercise	U	1
3	Students will understand about how the body uses and expends energy.	U	2
4	Understanding of the hormonal activity during exercise	U	2
5	To understand the regulation of carbohydrate and fat metabolism during exercise	A	3
6	To understand fatigue and its causes	U	10
7	Students should identify and analyze central and peripheral mechanisms of fatigue	An	10

Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)

COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course description	Hrs	CO No.
1	1.1	• Definition of Energy substrate, bioenergetics and metabolism	4	1

Basic energy sources	1.2	• Energy sources(Carbohydrate, fat and protein)	5	1
	1.3	• Controlling the Rate of Energy Production	3	1
	1.4	• Storing energy: high energy phosphate	4	1
2 Basic energy system	2.1	• The ATP-PCr system	4	2
	2.2	• The glycolytic system	4	2
	2.3	• The oxidative system	4	3
	2.4	• Oxidation of fat and protein	3	3
3 Hormonal regulation during exercise	3.1	• Endocrine system- hormones	4	4
	3.2	• Hormonal regulation of metabolism during exercise	4	4
	3.3	• Regulation of carbohydrate metabolism during exercise	4	5
	3.4	• Regulation of fat metabolism during exercise	3	5
4 Fatigue and depletion	4.1	Fatigue and its causes, energy systems fatigue	4	6
	4.2	• Metabolic by-products and fatigue	4	6
	4.3	• Lactic acid, hydrogen ions and fatigue	4	7
	4.4	• Neuromuscular fatigue	3	7
Teacher specific component	5			

Teaching and Learning Approach	**Classroom Procedure (Mode of transaction)** • Lecture (Chalk & Board, Power Point presentation) • Group discussion • Peer teaching • Demonstration Hands on training
Assessment Types	**MODE OF ASSESSMENT** **Continuous Comprehensive Assessment (CCA) 30** Theory CCA -15 marks (Written exam- short answer -10x1, viva) CCA -15 mark, (Presentation, individual involvement)

	End Semester Examination(ESE) 70 Marks ESE Theory –70 marks (Written examination theory – MCQ 10x1, Short Answer – 5x2, Short Essay - 4x5, Essay-2 x 15).

Programme	**BPES (Honours)**					
Course Name	**Applied Statistics**					
Type of Course	DCC					
Course Code	MG7DCCPES401					
Course Level	**400-499**					
Course Summary	This course provides an introduction to the principles and applications of applied statistics. Students will learn fundamental statistical concepts and methodologies and gain practical skills in using statistical tools to analyze and interpret data.					
Semester	7	Credits			4	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		4				60
Pre-requisites, if any	Basic knowledge in mathematic calculations, basic knowledge in ict platform					

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	To completely describe a data set, using appropriate descriptive statistics	K &U	1
2	To interpret a set of descriptive statistics and understand the limitations of each measure	U	1
3	Students shall be able to use and apply a wide variety of specific statistical methods	A &An	1 & 2
4	Students shall know how to organize, manage, and present data	U & A	2 & 3
5	Show ability to explore and organize data for analysis.	A	2
6	Apply inferential methods relating to the means of Normal distributions	A & C	3
7	Demonstrate understanding of the properties of probability and probability distributions.	U &An	1
8	Understand the basic functionalities of SPSS, including data entry, manipulation, and statistical analysis	A, C & S	1, 2, 9 & 10
Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)			

COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course description	Hrs	CO No.
1 Introduction to statistics	1.1	Meaning and Definition of Statistics, Need and importance of Statistics	4	1
	1.2	Types of Statistics Data, Types of Data. Variables; Discrete, Continuous. Parametric and Non-Parametric Statistics	4	1
	1.3	Graph Introduction: Features, properties, Graph interpretation of Line Diagram, Bar Diagram, Histogram, Frequency Polygon and Ogive Curve	4	1& 2
	1.4	Meaning, uses and construction of frequency table	3	2 & 5
2 Measures of central tendency & Dispersions	2.1	Meaning, Purpose, calculation, and advantages of Measures of central tendency –Mean, median and mode	4	2, 3, 4 & 5
	2.2	Measures of dispersion: meaning, purpose, calculations- Range, Quartile Deviation, Mean Deviation, Standard Deviation	5	2, 3, 4 & 5
	2.3	• Normal Curve: – Principles of normal curve – Properties of normal curve. • Divergence form normality – Skewness and Kurtosis	3	6 &7
	2.4	• Sample Distribution of Means, Standard Error of Mean	3	7
3 Probability Distributions	3.1	• Testing of Hypothesis- Region of Acceptance &Region of Rejection of Null and Alternative Hypothesis • Level of Significance and confidence. • Type I and Type II Errors	4	6 &7
	3.2	• One Tailed and Two Tailed test • Degrees of Freedom	3	6& 7
	3.3	• Tests of significance: Independent “t” test,	4	6 & 7

		Dependent “t’ test, chi - square test		
	3.4	• Meaning of correlation - co-efficient of correlation • Calculation of co-efficient of correlation by the product moment method and rank difference Method	4	6 & 7
4 Introduction to SPSS	4.1	• Analysis of Variance (ANOVA): Concept and calculations • ANCOVA: Concept and calculations • Post-hoc tests-LSD and Scheffe’s	4	6 & 7
	4.2	• Overview of SPSS interface • Data types and formats • Importing data into SPSS • Managing datasets: sorting, filtering, and recoding variables	4	4 & 8
	4.3	• Computing measures of central tendency and dispersion • Generating frequency distributions • Creating and interpreting charts and graphs	4	3 &8
	4.4	• t-tests: independent samples and paired samples • One-way ANOVA and post hoc tests • Understanding assumptions for parametric tests	3	3 & 8
Teacher specific component	5

Programme	**BPES (Honours)**					
Course Name	**LOGISTICS MANAGEMENT IN SPORTS AND FITNESS**					
Type of Course	DCE (Minor bunch)					
Course Code	MG7DCEPES408					
Course Level	**400-499**					
Course Summary	Logistics and Sports Management" is a comprehensive course that integrates principles of logistics with the dynamic field of sports management. Students will explore supply chain management, transportation, and inventory control, tailored to the specific needs of the sports industry. The curriculum covers event planning, facility management, and sports marketing strategies, providing a holistic understanding of how logistics plays a crucial role in optimizing sports operations. Practical case studies and real-world applications enhance students' skills in coordinating and managing the logistical aspects of sporting events and organizations.

SEMESTER -8

Mahatma Gandhi University
Kottayam

Programme	**BPES (Honours)**					
Course Name	**Sports Data Analytics**					
Type of Course	DCC					
Course Code	MG8DCCPES400					
Course Level	**400-499**					
Course Summary	A course on Data Analytics would typically cover the intersection of management and data-driven decision-making.					
Semester	8	Credits			4	Total Hours
Course Details	Learning Approach	Lecture	Tutorial	Practical	Others	
		3		1		75
Pre-requisites, if any						

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	To understand basic statistical concepts and their applications in the sports world	U	1
2	Improved decision making	A	2
3	To obtain a broad survey of the methods used in sports data acquisition	An	5
4	Increased efficiency and productivity	A	6
5	Enhanced customer experience	S	6
6	Improved risk management	E	2

Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)

COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course description	Hrs	CO No.
1 Introduction to Data Analysis	1.1	Data analytics and its importance in sports	4	1
	1.2	Role of data science in sports industry	4	1,2
	1.3	Probability and how it affects sports	3	2,1
	1.4	Data analytics in major games – Cricket, football, badminton	4	3
2. Player and team performance analysis (practical)	2.1	Player performance analysis	30	3,2
	2.2	Team performance analysis		3,2
	2.3	Athlete monitoring		2,3
	2.4	Anti-doping and fair play		1
3. Sports analytics professionals	3.1	Job description of a sports analytics profession	4	2
	3.2	Use of data to predict performances	4	3
	3.3	Tracking of fan engagement	4	4,1
	3.4	Importance of data in scouting	3	4,1,2
4. Strategy management (case study based)	4.1	Optimisation of strategic management using data analytics	30	4
	4.2	Becoming a sports analyst		4,2
	4.3	Avoiding injuries with the help of AI		4,2,1
	4.4	Fast data and what it means for sports analytics		4,5,6
5. Teacher Specific component				

Teaching and Learning Approach	**Classroom Procedure (Mode of transaction)** • Lecture (Chalk & Board, Power Point presentation) • Group discussion. • Peer teaching • Demonstration • Hands on training
Assessment Types	**MODE OF ASSESSMENT** **Continues Comprehensive Assessment (CCA) Total Mark - 35** Practical CCA-15 mark, (Presentation, individual involvement) Theory CCA -25 marks (Written exam- short answer -10x2, viva)
	End Semester Examination (ESE) Total Mark-85 ESE Practical -35 marks (Viva, presentation, assignment, quiz) ESE Theory – 50 marks (Written examination theory – MCQ 10x1, Short Answer – 10x2, Short Essay -4x5).

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains *	PO No
1	Understand the principles and terminology associated with performance mapping and data visualization	U	1
2	Analyze spatial and temporal patterns in athlete and team performance data. Analyse the strengths and weaknesses of different data visualization methods in a sports context	An	2
3	Develop the skills to interpret and communicate findings derived from performance mapping	S	5
4	Enhance technical skills for data cleaning, preparation, and visualization in a sports context	A	2
5	Evaluate the impact of technological advancements on sports equipment. Make informed recommendations for the use of innovative equipment in specific sports contexts.	E	1
6	Develop interactive data visualizations for analyzing sports performance	C	2
7	Create performance mapping dashboards for monitoring and evaluating athlete progress.	C	7

8	Apply performance mapping techniques to analyze individual athlete performance. Utilize data visualization tools to represent sports performance metrics effectively	A	3
Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)			

COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course description	Hrs	CO No.
1 **Introduction to Performance Mapping and Data Visualization Fundamentals**	1.1	Understanding the concept of performance mapping and data visualization	3	1
	1.2	Importance of performance mapping data and visualization in sports	3	1
	1.3	Recognize the importance of performance mapping for sports development and team strategy	3	2
	1.4	Principles of effective data visualization design	3	2
	1.5	Types of data and appropriate visualization methods	3	2
2. **Data Visualization Techniques & Application of Data Visualization in sports Performance Analysis**	2.1	Heatmaps, treemaps, and other advanced visualization methods	3	3
	2.2	Interactive data visualizations	3	2
	2.3	Geographic and spatial data visualization	3	4
	2.4	Analyze individual athlete performance through visual representations of key performance indicators (KPIs)	3	3
	2.5	Develop dashboards for monitoring and evaluating athlete progress over time	3	2
3. **Case Studies and Practical Applications**	3.1	Analyze team dynamics, strengths, and weaknesses through interactive and static visualizations	30	2,3,10
	3.2	Real-world examples of successful performance mapping and data visualization		2,3,10
	3.3	Apply spatial data visualization techniques to analyze player movement on the field/court.		2,3,10

	3.4	Understand the role of spatial analytics in sports performance evaluation		2,3,10
4. **Use of Geographic and Spatial Data in Sports Visualization &Future Trends**	4.1	Use of Geographic and Spatial Data in Sports Visualization (Player Movement Analysis, Team Dynamics and Formations, Injury Prevention and Player Wellness)	5	7
	4.2	Emerging technologies and trends in data visualization	5	5
	4.3	The role of artificial intelligence in performance analysis	5	4

COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course description	Hrs	CO No.
1 **Introduction to Sports Content Creation**	1.1	Overview of the sports content landscape – consumption of sports content – Rise of lifestyle sports content	4	2
	1.2	Content creation – scope, concepts and its relevance in sports – Types, trends and challenges in content creation.	4	1,2
	1.3	Effective storytelling in sports – team-specific content and sport-fandom content.	2	1
2 **Content Planning and Strategy**	2.1	Current sports industry trends – successful sports content campaigns - identifying target demographics in sports -analyzing fan behavior and preferences.	4	2,3
	2.2	Defining objectives and goals – short-term and long-term goals – aligning content goals with broader organizational objectives	3	2
	2.3	Creating a content calendar – importance of structured content calendar – balancing evergreen and timely content – incorporating major sports events and seasons.	4	2
3 **Writing and visual elements in sports content**	3.1	Writing for sports content - crafting engaging headlines and captions -developing effective sports narratives - writing styles for different platforms - writing scripts for sports videos and podcasts, crafting articles, blog posts and features.	4	2, 3 & 9
	3.2	Visual content – infographics-importance and relevance – basics of sports photography and videography	5	3, 4 & 6

		-memes, gifs, screenshots,360degree videos.		
	3.3	Interviewing Techniques for Sports Stories - Conducting effective interviews with athletes and sports personalities - Incorporating quotes and anecdotes into written content	4	5 & 8
	4.1	Exploration of social media platforms - twitter, Instagram, Facebook, YouTube, TikTok - understanding unique features - audience expectations.	2	3, 4 & 6
	4.2	Crafting Engaging Tweets for Sports - Leveraging Twitter for real-time sports updates - Creating engaging tweets and using hashtags effectively - Strategies for increasing engagement and fostering conversation	4	6 & 9
	4.3	Visual Storytelling on Instagram - Importance of visuals on Instagram in sports content - Crafting visually appealing sports posts and stories - Effective use of Instagram features for sports marketing	4	5, 6
	4.4	Building Communities on Facebook - Strategies for building sports communities on Facebook - Creating and managing sports-related groups and pages - Effective use of Facebook Live for sports content Video Content Strategies on YouTube - Leveraging YouTube for sports highlights, documentaries, and interviews - Creating engaging sports video content - Building and maintaining a sports-focused YouTube channel	6	4, 5, 6

	4.5	Copyright and intellectual property issues in sports content creation - Ethical considerations in content creation - Compliance with industry regulations and standards	5	4

Internship Project

It is mandatory for the student to who undertake Internship & project to seek advance written approval from the faculty guide and the head of the department about the topic and organization before commencing the IP. The IP may or may not have a Functional Focus, i.e. the student may take up a IP in his/her intended area of specialization or in any other functional area of management. Ideally the IP should exhibit a cross-functional orientation. IP can be carried out in a Corporate Entity / NGO / SME / Government Undertaking / Cooperative Sector/Private sector. SIP may be a research project – based on primary / secondary data or may be an operational assignment involving working by the student on a given task/assignment/project/ etc. in an organization / industry. It is expected that the IP shall sensitize the students to the demands of the workplace. Each student shall maintain a IP Progress Diary detailing the work carried out and the progress achieved daily. The student shall submit a written structured IP report based on work done during this period. The student shall submit the IP Progress Diary along with the IP Report. Students shall also seek a formal evaluation of their IP from the company guide. The formal evaluation by the company guide shall comment on the nature and quantum of work undertaken by the student, the effectiveness and overall professionalism. The learning outcomes of the IP and utility of the IP to the host organization must be specifically highlighted in the formal evaluation by the company guide. The IP evaluation sheet duly signed and stamped by the industry guide shall be included in the final IP report. The IP report must reflect 8 weeks of work and justify the same. The IP report should be well documented and supported by –

1. Institute's Certificate.
2. Certificate by the Company.
3. Formal feedback from the company guide.
4. Executive Summary.
5. Organization profile.
6. Outline of the problem/task undertaken.
7. Research methodology & data analysis (in case of research projects only).
8. Relevant activity charts, tables, graphs, diagrams, AV material, etc.
9. Learning of the student through the project.
10. Contribution to the host organization.
11. References in appropriate referencing styles. (APA, MLA, Harvard, Chicago Style etc.).

The completion of the IP shall be certified by the respective Faculty Guide & approved by the Head of the Department. The external organization (Corporate / NGO/ SME/ Government Entity/ Cooperative/ etc.) shall also certify the IP work. The students shall submit a spiral bound/Hard bind copy of the IP report by end of the semester. The College shall conduct an internal viva-voce for evaluation of the IP for 20 marks. The internal viva-voce panel shall provide a detailed assessment of the IP report and suggest changes required, if any. After the internal viva-voce, the student shall finalize the IP report by incorporating all the

suggestions and recommendations of the internal viva-voce panel. The internal guide shall then issue the Department Certificate to the student. The student shall submit TWO hard copies & one soft copy (CD) of the project report. One hard copy of the IP report is to be returned to the student by the Department after the External Viva-Voce. The Internal & the External viva-voce shall evaluate the SIP based on:

1. Adequacy of work undertaken by the student.
2. Application of concepts learned in Sem I, II, III, IV, VI and VII
3. Understanding of the organization and business environment.
4. Analytical capabilities.
5. Technical Writing & Documentation Skills.
6. Outcome of the project – sense of purpose.
7. Utility of the project to the organization.
8. Variety and relevance of learning experience.

Teaching and Learning Approach	12 credit Project/Internship, Interim presentations, assessment, evaluation & viva
Assessment Types	**Continuous Comprehensive Assessment (CCA) – 60 Marks** **End Semester Examination (ESE)- 140 Marks** **(Report- 60 marks, presentation & viva- 80 marks)**

Teaching and Learning Approach	8 credit project
Assessment Types	**Continuous Comprehensive Assessment (CCA) – 30 Marks** **End Semester Examination (ESE)- 70 Marks** **(Report- 30 marks, presentation & viva- 40 marks)** The Institute shall conduct an internal viva-voce for evaluation of the project. After the internal viva-voce, the student shall finalize the report by incorporating all the suggestions and recommendations of the internal viva-voce panel. The internal guide shall then issue the Institute's Certificate to the student. The student shall submit TWO hard copies & one soft copy (CD) of the project report. report is to be returned to the student by the Institute after the External Viva-Voce.
	External Evaluation There shall be an external viva-voce for the project. The external viva-voce shall be conducted after the theory exam. The Internal & the External viva-voce shall evaluate the project based on: 1. Adequacy of work undertaken by the student

	2. Application of concepts learned 3. Analytical capabilities 4. Technical Writing & Documentation Skills 5. Outcome of the project – sense of purpose 6. Utility of the project to the organization 7. Variety and relevance of learning experience.
